

EWING EDUCATION CLASSES ARE COMING TO YOUR AREA

July 12 & 13 | 8 a.m. – 10 a.m. | 2 hours | \$39 per class
Zoom Webinars | Taught in English

Protecting and Managing Tree Health

(July 12 | NCLCLB # 2222 | NCDA&CS # 600034)

Ewing's Protecting and Managing Tree Health class will examine what to look for when diagnosing the cause of tree problems and decline.

WHAT YOU'LL LEARN:

- How to differentiate between the signs and symptoms of plant pathogens.
- How to define biotic versus abiotic factors affecting trees.
- How to identify the stages of insect and fungi lifecycles and how they relate to effective control.
- And more!

Fertility Needs for Establishing and Maintaining a Healthy Turf

(July 13 | NCLCLB # 2223)

Ewing's Fertility Needs for Establishing and Maintaining a Healthy Turf class examines the nutrients required for plant growth and how to take soil samples to determine nutrient needs.

WHAT YOU'LL LEARN:

- How to take and handle a soil sample and how soil texture and pH relate to the results of the soil test.
- The components of a fertilizer label and its importance when selecting the right fertilizer.
- The many sources of nitrogen and how to determine which type of nitrogen to select.
- And more!
